

# POWERFIT 400AMP CONNECTORS

## OUTSTANDING FEATURE

**Innovative push-to-release design makes the uncoupling handy without additional Tool. This can be dismantled through small slotted screwdriver if needed.**

PowerFit employ flame-retardant thermoplastic with great performance on impact and temperature resistance. Unsurpassed and patent forward-pushing button makes the handling of coupling and uncoupling earlier ever. Contact is made of brass with silver plated providing excellent conductivity. POM cotter pin features great insulation, high stiffness and low friction. Compatible with major brands of lockable single pole connector. IP67 and CE compliant.
